

AIR-ONE

Heavy-duty design
you can rely on

AIR-ONE

Whether you're in the food and beverage industry or manufacturing industrial plastics, heavy duty jobs demand a compressor that's just as tough.

That's why Air-One reciprocating compressors are built to last, with proven longevity in harsh Australian conditions – heat, humidity, dust or cold.

A high quality, slow-running cast iron construction with the fewest possible components means your unit goes the distance, with less need for servicing. And if something does go wrong, you're backed by the Sullair local service team with GPS-tracked mobile service vans and genuine spare parts, to get you back up and running with minimal hassle and downtime.

OUR BRANDS

SULLAIR

The name you
can trust.

If your business runs on compressed air, then you need a reliable compressed air supplier. A company that understands the local conditions, goes above and beyond to solve even the most complex of problems, and helps you retain your competitive edge with smart new technologies and bright ideas.

Sullair is that business. Over the half-century we've been operating, we've been proud to support Australian industry across fields as diverse as mining, farming and healthcare.

We see ourselves not just as your supplier, but also as your partner – a proudly Australian operator backed by our international parent company Hitachi. Your success is our success. So if you can't do without compressed air, let's have a chat about what we can do for you.

DESIGNED FOR AUSTRALIAN CONDITIONS

Tropical North to desert centre and frosty extremities – no one on Earth knows harsh and varied environmental conditions like Australians. That's why it has been designed and engineered to suit Australian conditions.

OUR POINT OF DIFFERENCE

Customer support

FULL SUPPORT, NO WORRIES

When you buy a Sullair compressor, you're not just buying a compressor.

You're buying the peace of mind that comes with a national support team, including seven local offices, GPS-tracked mobile service vans, instructor-led and online training, plus the expertise of our technicians, who are factory trained using the latest tools and diagnostic techniques to ensure the optimum service of your compressor. So if anything ever goes wrong, or if you simply want to make sure that you're getting the most out of your compressor, just call **1300 266 773**. We've got you covered.

Spare parts

STELLAR SPARE PARTS AND PREMIUM ACCESSORIES

Don't compromise your business with sub-par parts and inexperienced service technicians - they'll only cost you more in the long run.

Our staff exclusively use Sullair-recommended accessories and genuine spare parts for years of reliable, trouble-free performance. We also stock everything in our national warehouse and satellite hubs so we can service you quickly and efficiently. All so we can minimise your downtime and get you back up and running promptly.

Heavy-duty design

DESIGN YOU CAN RELY ON

Our Air-One™ compressors are robust, slow running, and made from quality materials and parts that perform, such as the MEPS 2-compliant TEFC IP 55 drive motor.

We've designed them to have a longer life cycle with reduced service requirements, so you can rely on them for the long haul. Just like you can rely on us.

Ease of installation

HASSLE-FREE FROM START TO FINISH

When you invest in the Sullair Air-One™, we know you want it up and running as quickly as possible.

So we've made sure it's easy to install, with a tank-mounted receiver that's made and registered to the AS 1210. It's as simple as that.

Economic installation

ENERGY EFFICIENCY, RIGHT FROM THE GET-GO.

The entire Sullair range is designed with energy saving in mind.

Consider the Air-One™ compressor, which is pressure switch controlled so no energy is wasted while it responds to changing demands. Like all of our units, it's efficient, reliable, and always there to help you out.

THE PRODUCT

With easy installation, the Air-One™ is designed for longevity using high quality materials.

With its energy efficient design and slow running compressor pumps, Air-One™ has proven its longevity in the most challenging Australian conditions.

These units are ideal for fluctuating demands whilst remaining a reliable tool across the automotive, industrial, food and beverage and manufacturing industries. Using Genuine Sullair parts and our excellent nationwide service network, your Air-One™ is sure to run smoothly wherever you put it to work.
