OUR BRANDS

SULLAIR

The name you
can trust.

If your business runs on compressed air, then you need a reliable compressed air supplier. A company that understands the local conditions, goes above and beyond to solve even the most complex of problems, and helps you retain your competitive edge with smart new technologies and bright ideas.

Sullair is that business. Over the half-century we've been operating, we've been proud to support Australian industry across fields as diverse as mining, farming and healthcare.

We see ourselves not just as your supplier, but also as your partner – a proudly Australian operator backed by our international parent company Hitachi. Your success is our success. So if you can't do without compressed air, let's have a chat about what we can do for you.

DESIGNED FOR AUSTRALIAN CONDITIONS

Australia has some of the toughest working conditions for air compressors in the world. Only the strong survive. Sullair has built up a reputation over the past 40 years or so for turning up, ready to go - whatever the application, whatever size the job, wherever the job site. True power from a portable unit.

Our compressors win awards for their design and are market leaders in rotary screw compression – exactly what heavy industries such as drilling, require. Add to that, Sullair also offers the option of fully enclosed units for extra protection and sound control.

HIGH PRESSURE PORTABLE AIR COMPRESSORS

With Sullair, you don't have to compromise on power and performance when you need a portable high pressure compressed air solution. With Sullair, you get durability, reliability...and portability.

Sullair offers a full line-up of portable air compressors, from 185 to 1600 cfm in a pressure range from 100 psi to 500 psi.

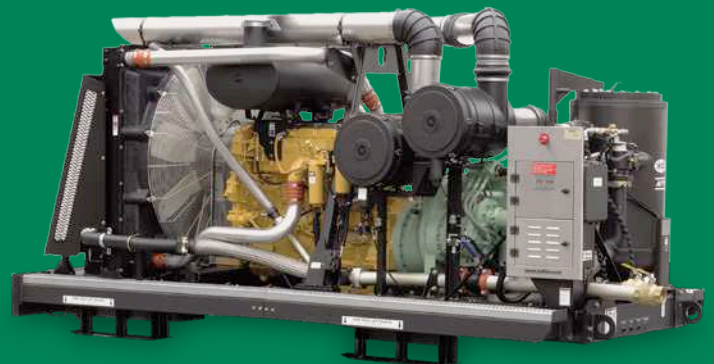

The Sullair Combo range has simple control systems and dual pressure capability 350/500psig pressure capability with the versatility to switch between the two with ease. Each model also has the famous Sullair Two stage Airend.

Designed to give you long and trouble free use of your compressor, even in the harshest conditions. To be absolutely sure you get maximum performance, we back every Sullair unit with unsurpassed, 24/7 service. Wherever you are, whenever you need us.

Because we know how important our units are to the overall job.

OUR POINT OF DIFFERENCE

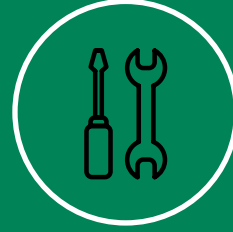

Customised

CUSTOMISE THE COMPRESSOR TO MEET YOUR SPECIFIC REQUIREMENTS

There's no point paying for features that you don't need, which is why your portable air compressor can be easily customised.

Choose from features like mine spec option, cold weather starting aid, harsh environment and rental ready specs and specialised paint whatever your specific requirements, your compressor will be ready to go.

Every fix is an easy fix

DESIGNED FOR TOTAL ACCESSIBILITY AND RELIABILITY, MEANING LESS RISK OF DOWNTIME

Every compressor will need maintenance at some stage, which is why your portable unit is designed to make servicing easy.

Large doors provide plenty of access to the fuel tank, engine, air filters and tool compartment, while a rear service panel puts coolers and radiators within easy reach. The result is less downtime, less cost of service and, thankfully, less hassle.

Airend Warranty

SO RELIABLE, WE'LL GUARANTEE IT

At Sullair, we don't take your trust in our products lightly.

So we're prepared to back everything we do 100%, or we don't do it at all. Because we're constantly fine-tuning how we can best deliver trouble free air-compression, we're happy to extend our standard two year Airend Warranty to five year or 10,000-hours when you follow our service plan. That way our confidence can rub off on your business.

The right fluid for the job

THE RIGHT FLUID FOR EXTREME TEMPERATURES, SO YOU CAN STAY COOL

If your business-as-usual runs at out-of-the-ordinary temperatures, you need industry formulated All Weather Fluid (AWF™) to help your portable air compressors deliver to potential.

Because AWF™ lasts up to four times longer, and carries our extended Airend Warranty, you can rely on superior hot and cold lubrication with less risk of downtime, whatever the weather.

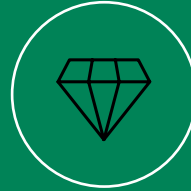

PRODUCT BENEFITS

Meets OH&S standards with full guarding of moving parts and quiet operation.

Hassle-free service with an easy-access enclosure.

Pioneering rotary screw technology and world-renowned design with high quality components.

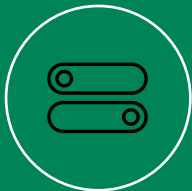

Keeping things cool on the inside, even when it's 50°C outside.

Designed for total accessibility and serviceability.

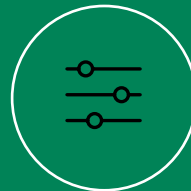

Two stage Dry Type Air Filters incorporate safety elements and are positioned to draw cool ambient air.

Dual Pressure allows you to switch between 350 and 500 psi simply via a switch for more flexibility and to achieve dual performance.

Heavy Duty frame with complete fluid containment of 120%. Bulkhead drain valves for all fluids are provided, all fluids are externally drained.

0 - 100% Capacity Control - Automatic inlet valve and unloaded starting

Emergency stop shuts down in the case of emergency, auto and remote start capability

THE HIGH PRESSURE PORTABLE RANGE

All over Australia, heavy industry relies on Sullair for quality portable solutions to help with any application, at any job site.

Sullair is your trusted compressed air partner. We offer a full line-up of portable air compressors, from 185 to 1600 cfm, in a pressure range from 100 psi to 500 psi.

We choose CAT engines for reliability and excellent availability of parts and service support globally.

A testament to Sullair portables overall strength, our portable units have a 49°C ambient rating. Every compressor in the portable range can operate, at full rated capacity, at 49 degrees Celsius.
