

HITACHI

AirLinx

Compressor Remote Monitoring

Features and Benefits:

- Remote Monitoring
- Energy usage reporting
- Maintenance planning & reporting
- Compressor health snapshot
- Proactive system monitoring
- Real time alerts

Stay Informed and In Control with AirLinx

With the AirLinx remote monitoring system, you can track your air compressor's performance in real time - right from your smartphone or computer. The intuitive dashboard makes it easy to view key parameters at a glance, while alerts notify you of any breakdowns or unscheduled stops, helping you respond quickly and confidently.

AirLinx also delivers a comprehensive service snapshot packed with detailed machine data, performance metrics, and operational insights - empowering you to make informed decisions and keep your equipment running at its best.

WHY AirLinx®

Data Monitoring Program

Taking a proactive approach when it comes to facility maintenance provides peace of mind that your equipment is always in perfect working order. This means bigger savings, less cost and no time wasted. You can streamline production processes, improve efficiency and reduce the stress out of running your business.

Ask yourself the following questions about your air compressor system:

- Do you know how effectively your compressor is performing?
- Do you know when your service is due?
- What production processes stop if the air compressor breaks down?
- Can you afford the cost of repair and lost production if it does break down?

AirLinx benefits you by providing:

- Compressor real time health snapshot
- Preventative notifications and warnings
- Texting/email alerts
- Asset tracking

Reduce the risk - keep an eye on your investment

With the AirLinx remote monitoring system you can record the parameters of the air compressor in real time and observe the performance of the machine through a simple and easy to read dashboard on your mobile or computer. AirLinx also alerts you to all breakdowns and unscheduled stops. This can help improve system reliability and protect your investment.
